Projects

CAN BE SUBMITTED IF NEEDED:

- using C# (.net framework) I was instructed to build a pet tracking system that can be used by any vet

result-I was able to build a visually appealing system that allows the owner to register and register any number of pets then the system generate a unique pet ID for each pet of the owner the owner can also update their details. The owner can change the status of the Pets, transfer the pet to another owner and the system keeps the records of all the transfers that have been made
-the vet can search pet owner by the pet ID
- The vet search owner by ID
-the vet can check status of pet
.
